

Enrolling in the Medicare Pilot Program for Asbestos Related Disease

Step One

Medicare needs to know you have an asbestos related disease. This is completed through the SSA.

• You have three options to obtain the EHH designation:

- 1) Go to the SSA office and sign the consent form.
- 2) Call the SSA at 888-482-3128 and have them send you the consent form.
- 3) Sign consent form at CARD, then contact SSA to let them know you signed the form at CARD. It is very important you call SSA to let them know as this starts the protective filing date which determines EHH effective date.

Step Two

Wait for the acceptance letter from the SSA which acknowledges the EHH designation.

- This will take approximately 2-3 weeks for SSA to complete this step.

Step Three

Contact NAS at 888-469-9464 to enroll in the MPPARD.

- NAS will send you an acceptance letter for the MPPARD approximately 1-2 weeks.
- Keep this letter and inform your provider/supplier you are enrolled in this program.

*SSA-Social Security Administration

*MPPARD – Medicare Pilot Program for Asbestos Related Disease

*NAS – Noridian Administrative Services

*EHH – Environmental Health Hazard
